

AIS Popularity Poll Final Report and Analysis
By Anita Moran, AIS Region 4

GENERAL DATA:

On February 1, 2026, at the end of the polling period for the American Iris Society (AIS) Popularity Poll, 390 people responded to the poll, after double entries were removed (5), which totaled 8,269 iris selections after unnamed irises were removed (8). Three entries were kept after the time had expired since they all occurred in regions outside EST and were less than an hour from the end of the survey. This averages to 21.20 entries per participant. Four people submitted poll entries twice. One person entered all individual information but failed to add any iris data; the dataset was deleted. To correct the double entries, the entries with the lowest amounts were deleted. Of the 390 respondents, 287 entered 25 irises or 73.59%. I believe this shows that even those with small collections felt comfortable in participating in the poll.

The resulting data were organized in a tabular format, with categories including the number of iris classes (TB, SDB, etc.), the number of participants per AIS Region, the number of entries per participant, and more. In addition, a special count was made to find the most popular iris chosen number one and the most popular iris overall, regardless of whether it was entered as one or twenty-five in rank. Corrections were made to entries with errors, including incorrect iris class and missing AIS Region class ID. Spelling errors were ignored except when they interfered with sorting. These corrections were not counted as corrections. One person had all the classes incorrect for his entries. These were easily corrected when sorting began.

Table 1: General Data from AIS Popularity Poll (Horizontal data entry)	
Number of participants	390
Number of entries	8269 irises
# of corrected entries	353, which is 4.26% over all entries
Average of entries per participant	21.2
Number of iris classes (TB, SDB etc)	14
Number of AIS Regions with participants	22 of 22 plus 4 International
Average number of participants per AIS Region (see Table 2 for actual numbers)	17.73
Most Popular Iris Overall	‘That’s All Folks’ TB (Maryott, 2005)

Number of entries per week of poll activity	Nov 1-7	77 entries
	Nov 8-14	19 entries
	Nov 15-21	10 entries
	Nov 22 – 28	21 entries
	Nov 29-Dec 5	11 entries
	Dec 6 – 12	12 entries
	Dec 13 – 19	7 entries
	Dec 20 – 26	29 entries
	Dec 27 – Jan 2	25 entries
	Jan 3 – 9	14 entries
	Jan 10 – 16	23 entries
	Jan 17-23	42 entries
	Jan 24 - 31	100 entries

AIS Region	Entries	AIS Region	Entries	AIS Region	Entries
1	18	9	5	18	20
2	6/ 2 CAN	10	8	20	11
3	7	11	12	21	19/ 4 CAN
4	31	12	12	22	16
5	6	13	28/2 CAN	23	16
6	21	14	43		
7	33	15	35	International	4
8	10	17	29	Canada	8
TOTAL number of participants = 390					

To further analyze the data, all entries had to be transposed to a vertical pattern. This took 1 hour, compared with 64 hours at the halfway point. Suggestion from Heather Haley and testing other options with halfway data allowed a rapid transition. Correcting the error took 8 hours, and the errors included an incorrect class, no class specified, misspelled cultivars, no named irises, and missing Region data. Having the data in a vertical format made catching errors and correcting them easier and enabled analysis for the overall popularity of iris, the popularity of iris in each class, the popularity of iris in each AIS Region, and the required corrections to be completed quickly. In the tables below, those with an "H" indicate historic irises.

Table 3: Comparison of Bearded/Beardless Entries (percentage of entries)	
Tall bearded iris	5386 (65.14 %)
Other bearded iris	1852 (22.40%)
Beardless iris	1030 (12.46%)
TOTAL	8268 entries

Table 4: Top Ten Irises Overall		
1	'That's All Folks' TB (Maryott 2005)	43
2	'Immortality' TB RE (Zurbrigg 1982) H	42
3	'Thornbird' TB (Byers 1989) H	40
4	'Dusky Challenger' TB (Schreiner 1986) H	39
5	'Gypsy Lord' TB (Keppel 2006)	38
6	'Daughter Of Stars' TB RE (D. Spoon 2001)	32
7	'Don't Doubt Dalton' (TB Burseen 2005)	31
8	'Jessie's Song' TB (Williamson 1983) H	30
8	'Stairway To Heaven' TB (Lauer 1993) H	30
10	'Dividing Line' MTB (Bunnell 2005)	29

The following tables show the top five per iris class. Each title includes the total number of entries for that iris class and the percentage of those entries relative to the total number of submitted entries (n=3252).

Table 5: Aril/Arilbred (231 entries, 2.79%)

SUMMARY

This report presents the final analysis of the data, and the popular irises sorted by Popularity of Irises compared to all other irises, Popularity of Irises based on Group (i.e., TB, SDB, etc.), and Popularity based on AIS Region including International responders, and Canadian responders data was added to the AIS Region they belong to and since I was interested, the data was separated to analyze by itself..

This poll nearly doubled the number of respondents from the last TB symposium. These are my thoughts:

1. This is a new poll, and people need to get used to a new, solely electronic poll, and I believe if it were easier get to the poll, the numbers might have been larger.
2. By allowing people to enter their favorite iris that grows well for them, people who do not grow TBs or grow a few TBs irises, faced with almost 500 irises to choose from, many of which they do not know, found it intimidating.

3. By allowing the respondents to input up to 25 irises, it allows for smaller growers to participate, which mean 26.41% of responders chose fewer than the 25 irises available.
4. Of the top 10 irises, 9 are TBs, and 7 of the 22 regions did not have TBs as the number 1 iris chosen.
5. Region 10 had no TBs chosen, but had 98% LA irises chosen
6. Comparing regions, 3 regions had < 50% TBs chosen, 5 Regions with TB between 50-60%, 5 Regions between 60-70%, and 9 regions with > 70% TBs.
7. After looking at the State data, those states with fewer than 3 participants provide little information.

In the future, it would be useful to ask participants for a zip code, which later could be matched to a USDA Hardiness Growth zone. This information, when combined with the participant's top irises in the popularity poll, would help gardeners choose irises that are known to grow well in their USDA Hardiness Zone.

Whoever analyzes the polling data, in the future, if they wish, can add "RE" to reblooming irises for RIS and "SA" for space age iris, and "BC" for broken color for the Novelty Iris Society and as I did for this analysis and add **H** for historic irises. All other societies, including SIGMA, can derive insights from this analysis as it stands.
